

Session 1.3: Multi-Sided Networks & Take Rates

Two-sided market mechanics, cross-side externalities, multi-homing costs, and DoorDash economics.

PART 1 (LECTURE)
60 Minutes

PART 2 (LAB PRACTICE)
60 Minutes

PART 3 (EXECUTIVE MEMO)
60 Minutes

STANDARD
Audited SEC Filings

Learning Objectives & Executive Overview

Clear conceptual grounding for undergraduate and graduate business students.

CORE COMPETENCIES

Goals

What You Will Master Today

- **Theoretical Mastery:** Evaluate seminal literature and analytical frameworks governing platform competition.
- **Empirical Rigor:** Reconcile management strategic claims with legally audited statutory filings.
- **Data Modeling:** Execute spreadsheet calculations with explicit coordinates and formula logic.
- **Executive Formulation:** Deliver structured board-level recommendations resolving complex trade-offs.

TWO-SIDED MARKETS

Vocabulary

Key Topical Foundations

- **Rochet & Tirole::** Cross-side network effects & side balance.
- **Armstrong Framework::** Single-homing vs. multi-homing dynamics.
- **Platform Governance::** Managing rules across buyers and suppliers.
- **Micro-Examples::** Food delivery, app stores, credit card networks.

Theoretical Foundations: Two-Sided Markets

Rigorous analytical frameworks and literature benchmarks.

THEORETICAL ARCHITECTURE

Literature

Seminal Framework Insights

- Rochet & Tirole::** Cross-side network effects & side balance.
- Armstrong Framework::** Single-homing vs. multi-homing dynamics.
- Platform Governance::** Managing rules across buyers and suppliers.
- Micro-Examples::** Food delivery, app stores, credit card networks.

STRATEGIC APPLICATION

Analysis

Business Model Mechanics

- Three-Sided Model::** Merchants, consumers, and Dashers (2021-2023).
- Multi-Homing Friction::** Restaurants listing on  Uber Eats" > Uber Eats &  Grubhub.
- Suburban Focus::** Winning high-basket suburban geographies.
- Software Lock-In::**  DoorDash Drive backend fulfillment integration.

STRATEGIC TAKEAWAY

Two-sided market mechanics, cross-side externalities, multi-homing costs, and DoorDash economics.

Seminal Literature & Economic Mechanics

Governing economic dynamics, externalities, and platform governance models.

ECONOMIC EXTERNALITY

Model

Network Externalities & Market Tipping

- **Positive Feedback Loops:** Adoption utility accelerates quadratically as the complementary user base expands.
- **Two-Sided Subsidization:** Balancing prices between money-side and subsidy-side to catalyze cross-network participation.
- **Multi-Homing Frictions:** Users and suppliers incurring setup and cognitive costs when operating across competing platforms.
- **Governance Standards:** Programmatic rules and interface contracts mitigating opportunistic market behavior.

STRATEGIC LEVER

Ecosystem Dynamics

Platform Architecture Mechanics

- **Rochet & Tirole::** Cross-side network effects & side balance.
- **Armstrong Framework::** Single-homing vs. multi-homing dynamics.
- **Platform Governance::** Managing rules across buyers and suppliers.
- **Micro-Examples::** Food delivery, app stores, credit card networks.

Strategic Showdown: Incumbent Architecture vs. Platform Ecosystem

Contrasting capital-intensive linear controls with scalable ecosystem orchestration.

LINEAR INCUMBENT MODEL

Physical Pipeline

Controlled Capacity & Heavy CapEx

- **Proprietary Asset Ownership:** Firms fund physical plant, equipment, and inventories directly on balance sheet.
- **Gatekeeper Curation:** Central corporate management manually selects products, vendors, and services.
- **Supply Chain Bottlenecks:** Expansion speed is strictly constrained by capital expenditure budgets and construction lead time.
- **Linear Economics:** Revenue growth requires proportional expansion in headcount and physical fixed assets.

PLATFORM ECOSYSTEM MODEL

Software Orchestrator

Algorithmic Matching & Asset-Light Scale

- **Externalized Production:** Community participants supply physical capital, labor, and distributed inventory.
- **Algorithmic Governance:** Two-way reputation systems and automated matching replace physical gatekeepers.
- **Zero Marginal Cost Expansion:** Adding new marketplace participants requires lines of code rather than land acquisition.
- **Exponential Leverage:** Transaction volume accelerates rapidly while corporate headcount remains tightly bounded.

CORE STRATEGIC DISPARITY

Pipelines compete by optimizing internal operations and erecting proprietary barriers. Platforms compete by orchestrating external ecosystems and minimizing friction across bilateral exchanges.

Case Showdown: DoorDash Trajectory

Historical case evidence and multi-year corporate trajectory confrontation.

CORPORATE DYNAMICS

Timeline & Strategy

➤ Strategic Positioning

- *Three-Sided Model::* Merchants, consumers, and Dashers (2021-2023).
- *Multi-Homing Friction::* Restaurants listing on  Uber Eats"> Uber Eats &  Grubhub.
- *Suburban Focus::* Winning high-basket suburban geographies.
- *Software Lock-In::* ➤ DoorDash Drive backend fulfillment integration.

ANALYTICAL FINDINGS

Empirical Evidence

Operational & Financial Results

- *DoorDash 10-K Data::* Marketplace GOV, GAAP Revenue, Order volume.
- *Take Rate %::* GAAP Revenue / Marketplace GOV (=C2/B2*100).
- *AOV & S&M Unit::* Average order value & marketing cost per order.
- *Margin Analysis::* Verifying take rate expansion from 12% to 13%+.

AUDITED CASE CONCLUSION

Two-sided market mechanics, cross-side externalities, multi-homing costs, and DoorDash economics.

Executive Dilemma: Executive Lab

Framing complex management dilemmas and evaluating corporate trade-offs.

EXECUTIVE CHALLENGE

Strategic Tension

Corporate Strategic Tension

- *Profitability Paradox::* \$8.6B revenue yet -\$558M GAAP net loss in 2023.
- *Switching Costs::* DashPass subscriptions & retail cross-selling.
- *Operational Breakeven::* Required % reduction in S&M expenses.
- *Strategic Memo::* Roadmap to sustainable GAAP operating margin.

EVALUATION RUBRIC

Requirements

Board-Level Deliverable

- *Actionable Recommendation:* Formulate a concrete 3-bullet decision brief for senior leadership.
- *Quantitative Defense:* Support recommendations using audited financial metrics from the lab spreadsheet.
- *Risk Mitigation:* Address channel friction, partner resistance, or competitive retaliation.
- *Implementation Timeline:* Define immediate 90-day execution milestones.

Lab Transition: 120-Minute Hands-On Execution

Transitioning from lecture observation to hands-on data manipulation and strategic decision-making.

EXERCISE 1: FOUNDATIONAL PRACTICE

60 Min Lab

Applied Excel Lab

Hands-on spreadsheet protocol using audited historical numbers:

- **DoorDash 10-K Data::** Marketplace GOV, GAAP Revenue, Order volume.
- **Take Rate %::** $\text{GAAP Revenue} / \text{Marketplace GOV} (=C2/B2*100)$.
- **AOV & S&M Unit::** Average order value & marketing cost per order.
- **Margin Analysis::** Verifying take rate expansion from 12% to 13%+.

EXERCISE 2+: ADVANCED PROBLEM SOLVING

60 Min Memo

Executive Lab

Applied scenario analysis, trade-off evaluation, and executive brief:

- **Profitability Paradox::** \$8.6B revenue yet -\$558M GAAP net loss in 2023.
- **Switching Costs::** DashPass subscriptions & retail cross-selling.
- **Operational Breakeven::** Required % reduction in S&M expenses.
- **Strategic Memo::** Roadmap to sustainable GAAP operating margin.
